Transition Hobsons Bay

Transition Hobsons Bay is a community group who aim to inspire a resilient and healthy future for our neighbourhoods in the face of climate change and the end of cheap oil.

We are part of a growing number of Transition Town groups around the world who see a positive future created locally by communities.

We share knowledge, ideas, experiences and skills for a greener future, and importantly, we make sure we have fun! It's free to join, so get in the loop with activities, conversations and projects in your area.
